

IMG Academy continues to use the utmost of caution to ensure the health and safety of everyone on campus. We have been following guidelines recommended by the CDC, Johns Hopkins All Children's Hospital, and the Florida Department of Health, and have established specific protocols and procedures applicable to all campus visitors, employees, and our overall facilities.

Visit our [Safer Campus page](#) to learn more about how we're prioritizing your safety and the health of all campers, visitors, families, and staff on campus.

For the most up-to-date travel restrictions, please visit the Centers for Disease Control and Prevention (CDC) website by clicking [here](#).

### JOHNS HOPKINS ALL CHILDREN'S HOSPITAL

Johns Hopkins All Children's Hospital is the exclusive provider of health services at IMG Academy. The Johns Hopkins All Children's health services team on-site includes pediatric sports medicine specialists, nurses, and physical therapists. Their team has been an incredible resource as we've worked to reopen our campus this year. Dr. Patrick Mularoni, Johns Hopkins All Children's Hospital medical director of health services at IMG Academy, has advised our leadership team and acted as liaison with local public health officials to keep IMG Academy up-to-date on the latest information.

Click [here](#) to view a webinar in which Dr. Mularoni discusses our on-campus health and safety protocols.

Please be sure to complete your health and safety forms in SchoolDoc as well as the JHACH Questionnaire that will be sent to you 24 hours prior to your arrival on campus. **Campers cannot participate in any camp activities until all required forms are completed.**

### TRAVEL TIPS FROM JOHNS HOPKINS ALL CHILDREN'S HOSPITAL

Johns Hopkins All Children's Hospital suggests that all campers traveling to IMG adhere to strict social distancing and mask use during their travel. Travelers should make sure to wash their hands regularly.

### BEFORE ARRIVAL (SPRING CAMPS)

Before arriving on campus, we need to learn more about your camper's recent health and travel history.

- Please be sure to complete your health and safety forms in SchoolDoc as well as the JHACH COVID Questionnaire. These will be sent to you a week prior to camp arrival.
- As part of this process, proof of COVID vaccination (for those that are fully vaccinated) and a negative COVID test result should be submitted. Both unvaccinated and vaccinated campers are required to provide a negative COVID test result taken within 96 hours of arrival.
- Tests can be either Rapid Antigen or PCR, they cannot be over-the-counter home tests. The COVID Questionnaire should be completed 24 hours prior to arrival.
- Campers will not be allowed on campus if these forms have not been completed.
- Campers cannot participate in any camp activities until all required forms are completed.
- Campers should also bring at least two cloth face coverings (easily laundered), that can be worn during the duration of their camp.

## **CHECK-IN AND ARRIVAL**

Upon arrival, all campers and families will be directed to the Campus Center where the check-in process will be conducted. Only campers who have submitted all required documents, passed the COVID Questionnaire and submitted a negative COVID test will be allowed on campus.

Out of an abundance of caution we are limiting facility access for parents and families due to health and safety of our on-campus population. We will have our Campus Life team assist with move-ins and have activities outdoors for families to enjoy.

Please note the below reminders as you prepare to check-in with us:

- Check-in will take place between 12 p.m. – 5 p.m. at the Academic Building; Please enter campus using the Bollettieri Blvd. entrance.
- Campers cannot have more than two other individuals with them at check-in.
- For the safety of those on campus, we ask that those not participating in camp remain outside campus buildings. There will be designated outdoor waiting areas.

## **DURING CAMP**

In response to COVID-19 and in connection with recommendations from the American Camp Association, campers will be broken out into both large and small pods, based on age, skill and sport. These pods will socialize, participate in their sport and dine together with the goal of decreasing the amount of contact they will have with the larger population.

The purpose of these pods is to help limit interactions between our entire camp populations; however, complete separation of campers will not always be feasible. There will be times when pods may interact with one another (free time and after-sport activities, etc.). This interaction will be limited to and done within similar age groups.

Daily health screenings will be conducted by IMG staff member. Campers exhibiting any COVID-19 symptoms while on campus will be sent to Health Services. Johns Hopkins All Children's Hospital will then follow established procedures recommended by the Department of Health to isolate and administer a COVID-19 test for the individual if necessary. Isolation will occur either in Health Services away from other campers or in one of our lodge units with a private bathroom.

For their safety and the safety of others, the camper will be unable to participate in camp activities until cleared by Johns Hopkins All Children's Hospital. All campers are expected to abide by our Campus Health and Safety Protocols, as well as the IMG Academy Camp Rules.

A copy of the camp rules can be found in SchoolDoc.

### **IF A CAMPER TESTS POSITIVE**

If a camper tests positive for COVID-19 at any point while attending camp at IMG Academy, IMG Academy's Director of Health and Safety will work with JHACH and the Florida Department of Health to conduct any necessary contact tracing. **Parents/Guardians of the sick camper and parents/guardians of any campers who have been deemed a close contact , will be required to arrange for the camper to leave campus within 48 hours (international) or 24 hours (domestic) of receipt of notice.** While we know this is not ideal, it is essential in maintaining a safe environment for the remainder of the IMG Academy community. If a vaccinated camper is a close contact and tests negative, they will be allowed to remain for the remainder of their scheduled camp.

---

### **CAMP CHECK OUT**

**Campers must be checked out of their residence hall by 11 a.m. on check-out day.**

- If your camper is being transported to the airport:
  - After receiving their check-out pass from their Campus Life Mentor, campers should go to the Campus Desk to collect their passport, remaining spending money, and meet up with their IMG transport.
- If you are coming to pick up your camper:
  - Parents should remain in their cars or wait outside the Campus Center while their camper checks-out.
  - A Campus Desk representative will be stationed outside the Campus Center. Parents can call their camper on their cell phone to tell them they have arrived or approach the Campus Desk employee who will call the dorms for the camper to be sent over for check-out.
  - **Please feel free to call the Campus Center for additional info or to let us know you are on your way at 941-749-8748.**
