

IMG ACADEMY BOARDING SCHOOL HEALTH AND SAFETY INFORMATION

This is a working document and will continue to be updated as policies and protocols are added or evolve.

IMG Academy is continuing to use the utmost of caution regarding the health and safety of everyone on campus. We have been following guidelines recommended by the CDC, Johns Hopkins All Children's Hospital, and the Florida Department of Health. We have established specific protocols and procedures moving forward applicable to all campus visitors, employees, and our overall facilities.

Visit the link below to learn more about how we're prioritizing your safety and the health of all students, campers, visitors, families, and staff on campus.

JOHNS HOPKINS ALL CHILDREN'S HOSPITAL

Johns Hopkins All Children's Hospital is the exclusive provider of health services at IMG Academy. The Johns Hopkins All Children's health services team onsite includes pediatric sports medicine specialists, nurses and physical therapists. Their team has been an incredible resource as we forged a path to reopen our campus this year. Dr. Patrick Mularoni, Johns Hopkins All Children's Hospital medical director of health services at IMG Academy, has advised our leadership team on what protocols to implement as well as liaised between local public health officials to keep us up to date on the latest information.

If you would like to hear directly from Dr. Mularoni, please [click here](#) to view a webinar in which he discusses our on-campus health and safety protocols.

Please be sure to complete your health and safety forms in SchoolDoc as well as the JHACH Questionnaire that will be sent to you no later than 48 hours prior to your arrival on campus. **Students cannot participate in any group activities until all required forms are completed.**

TRAVEL TIPS FROM JOHNS HOPKINS ALL CHILDREN'S HOSPITAL

Johns Hopkins All Children's Hospital suggests that all students travelling to IMG adhere to strict social distancing and mask use during their travel. Travelers should make sure to wash their hands regularly. Due to the stay-at-home efforts many athletes have limited their activity from normal levels, and they suggest that you prepare for school by getting outside to acclimate to the warmer summer temperatures and to increase your fitness as you prepare for training.

BEFORE ARRIVAL

Before arriving on campus, we need to learn more about your student's recent health and travel history.

- More check-in information will be available soon. If you are returning to campus early, your sport director and coaches will reach out to you directly and have specific protocols for you to follow so that you will not be interacting with the camper population.
- A questionnaire for Johns Hopkins All Children's Hospital (JHACH) must also be completed between 6 days prior to arrival and 48 hours before you arrive on campus. This questionnaire will be sent to you in a separate email.
- Students will not be allowed on campus if these forms have not been completed.
- Students should also bring at least four to five cloth face coverings (easily laundered), that can be worn during the duration of their stay.
- All non-boarding students should enter the campus at the west gate for their initial screening with Johns Hopkins All Children's Hospital.

CHECK-IN REMINDERS

Please note the below reminders as you prepare to check-in with us:

- Check-in for July football arrivals will take place between 8 a.m. – 4 p.m. at the Academic Building; Please enter campus using the Bollettieri Blvd. entrance.

IMG ACADEMY BOARDING SCHOOL HEALTH AND SAFETY INFORMATION

This is a working document and will continue to be updated as policies and protocols are added or evolve.

- You will be sent a recommended check-in time to help lessen the crowding at check-in
- Face coverings must be worn during the entire check-in process
- Students cannot have more than two other individuals with them at check-in
- For the safety of those on campus, we ask that anyone who is not a student remain outside campus buildings unless otherwise directed by an Academy staff member. There will be designated outdoor waiting areas.

UPON ARRIVAL

Upon arriving, all students will be screened by our on-site Johns Hopkins All Children's Hospital staff and will have their temperature checked. Any students that fail the screening process will have to be isolated and monitored by Academy and JHACH staff.

Out of an abundance of caution we are limiting facility access for parents and families due to health and safety of our on-campus population. You should only enter a campus building if directed by an IMG Academy staff member. **Feel free to walk from building to building with your student, but refrain from grouping with the families. Always social distance and please bring and wear a face mask while on campus and near other students.** We will have our Campus Life team assist with move-ins and have activities outdoors for families to enjoy. Academy staff will be able to direct you to restroom facilities for your use while on campus.

DURING THE SCHOOL YEAR

In response to COVID-19, student activities will be kept separate from any camp activities that may be going on simultaneously (including training, field time, mealtime, etc.) Temperature checks will be administered each night before bed. If a student has a temperature of 100.4 or higher following a temperature screening OR exhibits any COVID-19 symptoms while on campus, they will be sent to Health Services. Johns Hopkins All Children's Hospital will then follow established procedures recommended by the Department of Health to isolate and administer a COVID-19 test for the individual if necessary. Isolation will occur either in Health Services away from other students or in one of our lodge units with a private bathroom. For their safety and the safety of others, the student will be unable to participate in activities until cleared by Johns Hopkins All Children's Hospital.

IF A STUDENT TESTS POSITIVE

If a student tests positive for COVID-19 at any point while at IMG Academy, IMG Academy's Director of Health and Safety will work with JHACH and the Florida Department of Health to administer any necessary contact tracing. The student will then be isolated either in Health Services away from other student-athletes and campers or in one of our lodge units with a private bathroom. The student will then be isolated between 10 and 14 days as recommended by Campus Health staff and county health officials. Parents/Guardians of the sick student may come and take the student home if able.

The IMG student plan calls for pods of students who will train together, eat together and will be involved in after sport activities together. Although we will be employing safety measures such as daily screening of students and staff, mask use indoors and frequent hand sanitizing, the relationship of students within a pod will still likely be considered a "household contact" should a member of the pod become ill with COVID-19.

If your student is in the same pod as the student who tested positive your student along with the rest of their pod will need to be isolated from other students and won't be able to participate in all of the regularly scheduled activities. Students will still have the opportunity for daily training and activities within their pod.

Current CDC recommendations require anyone exposed to COVID-19 avoid contact with others outside their household for 14 days. Even if a student is tested and is negative this does not negate the need for a 14-day quarantine. Currently, the Florida Department of Health does not recommend testing anyone who is not presenting symptoms.
